## Life Beyond Vision Custom Ocular Prosthesis

Loss of an eye can be very challenging, psychologically, and emotionally. To counteract the challenging situation an ocular prosthesis is given to uplift the patient psychologically, improve confidence and the aesthetic value of the face and eye. It will not give vision but it will surely change the quality of life and the visionary of the person by boosting confidence to see life in a positive and better way. Custom made ocular prosthesis is preferred to readymade prosthesis as it improves the comfort and match with that of the adjacent natural eye. The care of prosthesis is easy and simple.
